British Election Study

2014-2024

Combined Waves 1-29 Internet Panel Codebook

{ University of Manchester
University of Oxford
Royal Holloway

Introduction

The British Election Study 2019-2024 is managed via a consortium of the University of Manchester, the University of Oxford and Royal Holloway, University of London. The Scientific Leadership Team is comprised of Professor Ed Fieldhouse, Professor Jane Green, Professor Geoff Evans, Dr Jonathan Mellon and Dr Christopher Prosser. The team is supported by Drs. Jack Bailey, James Griffiths and Stuart Perrett.

Wave 1
30,590 respondents took wave 1. Wave 1 was conducted by YouGov between 20th February 2014 and 9th March 2014.

Wave 2
30,219 respondents took wave 2, 26,870 of these also took wave 1. The overall wave on wave retention was 88.9%. Wave 2 was conducted by YouGov between 22nd May 2014 and 25th June 2014.

Wave 3
27,839 respondents took wave 3 of the British Election Study, 24,016 of these also took wave 2. The overall wave on wave retention was 79.4%. In total there are 21,471 respondents who took all of the first three waves of the survey, 71.0% of the respondents who originally took wave 1. Wave 3 was conducted by YouGov between 19th September 2014 and 17th October 2014.

Wave 4
31,328 respondents took wave 4 of the British Election Study. 23,542 of these also took wave 3. The overall wave on wave retention was 84.6%. There are 18,958 respondents who took all of the first four waves of the survey, 62.7% of respondents who originally took wave 1. Wave 4 was conducted by YouGov between 4th March 2015 and 30th March 2015.

Wave 5
30,725 respondents took wave 5 of the British Election Study. 28,073 of these also took wave 4, an overall wave on wave retention rate of 89.6%. 17,673 respondents took all of the first five waves of the survey, 58.5% of respondents who originally took wave 1. Wave 5 was conducted by YouGov between 31st March 2015 and 6th May 2015.

Wave 6
30,027 respondents took wave 6 of the British Election Study. 27,926 of these also took wave 5, an overall wave on wave retention rate of 90.9%. 26,112 respondents took all three election waves (4,5 and 6). 16,799 respondents took all of the first six waves of the survey, 55.6% of respondents who originally took wave 1. Wave 6 was conducted by YouGov between 8th May 2015 and 26th May 2015.

Wave 7
30,895 respondents took wave 7 of the British Election Study. 21,044 of these also took wave 6, an overall wave on wave retention rate of 70.0%. 13,309 respondents took all of the first seven waves of the survey, 44.0% of respondents who originally took wave 1. Wave 7 was conducted by YouGov between 14th April 2016 and 4th May 2016.

Wave 8
33,502 respondents took wave 8 of the British Election Study. 24,432 of these also took wave 7, an overall wave on wave retention rate of 79.1%. 11,408 respondents took all of the first 8 waves of the

survey, 37.7% of respondents who originally took wave 1. Wave 8 was conducted by YouGov between 6th May 2016 and 22nd June 2016.

Wave 9
30,036 respondents took wave 9 of the British Election Study. 27,555 of these also took wave 8, an overall wave on wave retention rate of 82.2%. 10,170 respondents took all of the first 9 waves of the survey, 33.6% of respondents who originally took wave 1. Wave 9 was conducted by YouGov between 24th June 2016 and 4th July 2016.

Wave 10
30,319 respondents took wave 10 of the British Election Study. 19,380 of these also took wave 9, an overall wave on wave retention rate of 64.5%. 7,351 respondents took all of the first 10 waves of the survey, 24.3% of respondents who originally took wave 1. Wave 10 was conducted by YouGov between 24th November 2016 and 12th December.

Wave 11
31,014 respondents took wave 11 of the British Election Study. 21,990 of these also took wave 10, an overall wave on wave retention rate of 70.9%. 6,472 respondents took all of the first 11 waves of the survey, 21.2% of respondents who originally took wave 1. Wave 11 was conducted by YouGov between 24th April 2017 and 3rd May 2017.

Wave 12
34,464 respondents took wave 12 of the British Election Study. 25,395 of these also took wave 11, an overall wave on wave retention rate of 81.9%. 5,832 respondents took all of the first 12 waves of the survey, 19.3% of respondents who originally took wave 1 Wave 12 was conducted by YouGov between 5th May 2017 and 7th June 2017.

Wave 13
31,196 respondents took wave 13 of the British Election Study. 26,669 of these also took wave 12, an overall wave on wave retention rate of 77.4%. 5,300 respondents took all of the first 13 waves of the survey, 17.5% of respondents who originally took wave 1. Wave 13 was conducted by YouGov between 9th June 2017 and 23rd June 2017.

Wave 14
31,063 respondents took wave 14 of the British Election Study. 20,393 of these also took wave 13, an overall wave on wave retention rate of 65.5%. 4,191 respondents took all of the first 14 waves of the survey, 13.9% of respondents who originally took wave 1. Wave 14 was conducted by YouGov between 4th May 2018 and 21st May 2018.

Wave 15
30,842 respondents took wave 15 of the British Election Study. 20,129 of these also took wave 14, an overall wave on wave retention rate of 64.8%. 3,206 respondents took all of the first 15 waves of the survey, 10.6% of respondents who originally took wave 1. Wave 15 was conducted by YouGov between 11th March 2019 and 29th March 2019.

Wave 16
37,959 respondents took wave 16 of the British Election Study. 20,063 of these also took wave 15, an overall wave on wave retention rate of 65.1%. 2,427 respondents took all of the first 16 waves of the

survey, 8% of respondents who originally took wave 1. Wave 16 also included a panel refresh, see below for more details. Wave 16 was conducted by YouGov between 24th May 2019 and 18th June 2019.

Wave 17
34,366 respondents took wave 17 of the British Election Study. 22,394 of these also took wave 16, an overall wave on wave retention rate of 59%. 1,882 respondents took all of the first 17 waves of the survey, 6.2% of respondents who originally took wave 1. Wave 17 was conducted by YouGov between 1st November 2019 and 12th November 2019.

Wave 18
37,825 respondents took wave 18 of the British Election Study. 25,425 of these also took wave 17, an overall wave on wave retention rate of 74%. 1,589 respondents took all of the first 18 waves of the survey, 5.2% of respondents who originally took wave 1. Wave 18 was conducted by YouGov between 13th November 2019 and 11th December 2019.

Wave 19
32,177 respondents took wave 19 of the British Election Study. 26,227 of these also took wave 18, an overall wave on wave retention rate of 69.3%. 1,394 respondents took all of the first 19 waves of the survey, 4.6% of respondents who originally took wave 1. Wave 19 was conducted by YouGov between 13th December 2019 and 23rd December 2019. 7th

Wave 20
31,468 respondents took wave 20 of the British Election Study. 17,794 of these also took wave 19, an overall wave on wave retention rate of 55.3%. 898 respondents took all of the first 20 waves f the survey, 2.9% of respondents who originally took wave 1. Likewise, 2,100 respondents (12.7%) took all waves between wave 9 (the post-EU referendum wave) and wave 20 and 3,885 respondents (19.5%) took all waves between waves 13 (the post-2017 election wave) and wave 20. Wave 20 was conducted by YouGov between 3 and 21 June 2020.

Wave 21
30,281 respondents took wave 21 of the British Election Study. 16,514 of these also took wave 20, an overall wave on wave retention rate of 52.5%. 629 respondents took all of the first 21 waves of the survey, 2.1% of respondents who originally took wave 1. Wave 21 was conducted by YouGov between 7th May 2021 and 25th May 2021.

Wave 22
28,113 respondents took wave 22 of the British Election Study. 19,241 of these also took wave 21, an overall wave on wave retention rate of 63.5%. 532 respondents took all of the first 22 waves of the survey, 1.7% of respondents who originally took wave 1. Wave 22 was conducted by YouGov between 26th November 2021 and 15th December 2021.

Wave 23
30,949 respondents took wave 23 of the British Election Study. 20,235 of these also took wave 22, an overall wave on wave retention rate of 72%. 458 respondents took all of the first 23 waves of the survey, 1.5% of respondents who originally took wave 1. Wave 23 was conducted by YouGov between 6th May 2022 and 26th May 2022.

Wave 24
This was a supplemental wave with a reduced sample size, that mainly includes only core BESIP questions. As such, 15,439 respondents took wave 24 of the British Election Study. 12,911 of these also took wave 23, an overall wave on wave retention rate of 41.7%. 252 respondents took all of the first 24 waves of the survey, 0.8% of respondents who originally took wave 1. Wave 24 was conducted by YouGov between 1st December 2022 and 14th December 2022.

Wave 25
30,407 respondents took wave 25 of the British Election Study. 19,549 of these also took wave 23 with a retention rate of 63%. 11,391 took wave 24, with a retention rate of 74%. Wave 25 was conducted by YouGov between 5th May 2023 and 23rd May 2023.

Wave 26
30,064 respondents took wave 26 of the British Election Study. 9,933 respondents who completed wave 26 also completed wave 24 (a retention rate of 64.3%); 19,942 respondents who completed wave 26 also completed wave 25 (65.6%). Wave 26 was fielded by YouGov between May 3rd 2024 and May 22nd 2024.

Wave 27
30,445 respondents took wave 27 of the British Election Study. 22,237 respondents who completed wave 27 also completed wave 26 (a retention rate of 74.0%). Wave 27 was fielded by YouGov between May 24th 2024 and 7th June 2024.

Wave 28
31,582 respondents took wave 28 of the British Election Study. 23,249 respondents who completed wave 28 also completed wave 28 (a retention rate of 76.4%). Wave 28 was fielded by YouGov between June 10th 2024 and July 3rd 2024.

Wave 29
31,098 respondents took wave 29 of the British Election Study. 24,796 respondents who completed wave 29 also completed wave 28 (a retention rate of 78.5%); Wave 29 was fielded by YouGov between July 5th 2024 and July 19th 2024. The retention rate between wave 26 and wave 29 is 72%, and the retention between wave 27 and wave 29 is also 72%.

Wave-on-wave retention

Respondents who drop out of one wave of the panel are re-invited to take later waves of the survey, and so the wave-on-wave retention rate for any pair of waves is considerably higher than the overall panel retention rate.

Frequency distribution of waves taken by a respondent

Waves	Frequency	Percentage	Cumulative Percentage
1	23,048	19.43	19.43
2	12,539	10.57	30.01
3	10,397	8.77	38.77
4	8,082	6.81	45.59
5	6,655	5.61	51.2
6	6,129	5.17	56.37
7	5,036	4.25	60.61
8	4,608	3.89	64.5
9	4,521	3.81	68.31
10	4,029	3.4	71.71
11	3,738	3.15	74.86
12	3,690	3.11	77.97
13	3,578	3.02	80.99
14	2,878	2.43	83.42
15	2,297	1.94	85.35
16	2,117	1.79	87.14
17	2,089	1.76	88.9
18	2,033	1.71	90.61
19	1,898	1.6	92.21
20	1,591	1.34	93.55
21	1,361	1.15	94.7
22	1,255	1.06	95.76
23	1,118	0.94	96.7
24	1,033	0.87	97.57
25	930	0.78	98.36
26	778	0.66	99.01
27	645	0.54	99.56
28	389	0.33	99.89
29	135	0.11	100
Total	118,597	100	100

Geography

This dataset includes the old (2010-2024) and new (2024 onwards) constituency boundaries. All geographic variables in the BES Internet Panel come from YouGov's database of panellist-specific profile data. YouGov collects these data on panellists from time to time, most often outside of our panel. We link these data (routed from postcode sector) to each of our respondents in the panel, and take the most recently observed instance of each geographic variable before the date that each respondent took our survey. In some cases, the respondent's postcode sector will overlap more than one linked geographical area. In these cases, we assume that the respondent lives in the area that the postcode sector shares the greatest overlap. As such, we advise our users to check the geographic variables in the data carefully before conducting any analyses.

We have retroactively separated respondents into the new constituencies for all waves of the panel, even though these constituencies did not exist at the time the survey was taken. This is to allow for analyses of change over time using the new boundaries.

Weights and samples
Around 30,000 respondents were interviewed in each wave (referred to as the full sample). However, for waves 1-9 we also defined a smaller core sample of around 21,000 respondents in each wave that constitute a cross-sectional group which is more representative than the full sample (i.e. the range of weights is smaller than in the full sample). From waves 1 to 21, the panel uses a European elections franchise as its sampling frame, whereafter a local elections franchise is used (following the UK leaving the EU).

For waves 1-9 we provide two cross-sectional weights for each wave, e.g. the full weight that covers all respondents who took the wave 6 survey (e.g. wt_full_W6) and the core weight that weights a smaller more representative sample of respondents (e.g. wt_core_W6). From wave 10 onwards we use an updated YouGov weighting schema (e.g. wt_new_W25) and no longer provide the core weights. For wave 10 and 11 we also provide weights using the original full weighting scheme for comparison. We recommend using the new weighting schema where it is available. We have also retrospectively calculated weights for previous panel waves using the new weighting schema.

The panel dataset includes a cumulative weight that covers respondents who have taken all waves so far in the study. Until wave 9, this weight is named with the total number of waves covered by the weight (e.g. wt_full_W1W2W3W4W5W6W7W8W9). To avoid increasingly long variable names, from wave 10 onwards we adopt a new naming convention, which covers the start and end waves of the cumulative weights (e.g. wt_full_W1_W13, which covers respondents who have taken all waves between wave 1 and wave 13).

We also include cumulative panel weights that cover smaller combinations of waves that were fielded around key electoral events:

- 2015 election pre-campaign-post waves (wt_full_W4W5W6)
- 2016 EU referendum pre-campaign-post-waves (wt_full_W7W8W9)
- 2017 election pre-campaign-post waves (wt_new_W11_W13)
- 2019 election pre-campaign-post waves (wt_new_W17W18W19)
- 2024 election pre-campaign-post waves (wt_new_W27W28W29)

For the four campaign waves (waves 5, 8, 12 18, and 28) we also provide daily weighting variables (e.g. wt_daily_W5) that cover respondents who took the survey on a particular day (see below for more information about the campaign wave sampling).

All of these weights are constructed at the regional level (i.e. Scotland, England, Wales and London are weighted separately to population values) and then adjusted to account for the oversampling of Scottish and Welsh voters.

While we have a pretty large sample of people who took wave 19 and wave 29 (15,083), there are a relatively low number of 18-24 year olds in this sample (227). This is partly because of the long gap between the two waves compared to other elections, but also because wave 19 had a lower number of 18-24 year olds than usual. As a result, it is not possible to split the weights by region, so YouGov created an overall Great Britain weight. This produces some high weights (highest five weights – 47,35, 35, 29, 29) and has a low weighting efficiency (33.4%). We are looking at ways to resolve this in a future update.

Country items
In addition to the core items, there are sets of questions written specifically for each of the nations included in this survey: England, Scotland and Wales (note that Northern Ireland is not included in this survey due to the very different political situation there).

The largest country-specific section is in Scotland, where the BES includes items inquiring about many aspects of the Scottish referendum campaign and preferences about independence.

To allow for a comparison of different devolved contexts, many of these questions are repeated in Wales.

Top up items
Top up items are asked to all respondents in the first wave that they take part in. These are generally demographic and attitudinal variables that are believed to be fairly stable over time. These include:

- Occupation
- Parent's occupation
- Country of birth
- Union membership
- Left-right values

While some of these can change, they do not need to be asked in every wave. These top up items are combined into multiwave variables that can used to identify the wave in which respondents were asked these question, which is the first wave indicated by the suffix in which the respondent appears. E.g. a question with a W1W2W3 suffix would mean that the variable is measured in wave 1 for all those who took the survey in wave 1, wave 2 for those who joined the survey in wave 2, wave 3 for those who joined the survey in wave 3 etc, whilst a variable with W3W4W5 would indicate that the question was asked to all respondents in wave 3, and then new respondents who joined in wave 4 and wave 5 in wave 4 and wave 5 respectively. Given the number of waves now completed, this has been truncated where appropriate, eg to W1_W23 if topped up in each of the waves from 1 to 23.

In addition to these variables, the BES also includes much of the information that YouGov routinely collects about all members of their panel.

- Age
- Highest qualification
- Home ownership
- Marital status
- Age left education (we already have highest qualification)
- Ethnicity
- Local authority and education authority
- Household income
- Personal income
- Household size
- Number of children in household
- Preferred daily newspaper
- Vote choice in 2010
- Religiosity
- Religious denomination
- Type of organization worked for

Having these measures from YouGov's existing data leaves more space for other important questions on the rest of the survey and avoids asking respondents for information they've already provided in the past. These variables have the prefix 'p_'. Profile variables are collected at intervals determined by YouGov and therefore should not be assumed to be measured at the time of a wave. Profile information with a wave identifier attached indicates that the profile data was the most up to date available at the time of that survey.

Playground items
The playground contains items that are only asked to subsets of respondents. Because of the number of questions asked to Scottish and Welsh respondents, initially these questions are only asked to English respondents. As survey space allowed, Scottish and Welsh respondents were added to the playground as well. These questions are primarily suggested by the community of academic users. Additionally, some questions from the previous round of the British Election Study in 2010 are included in the playground for comparability. Finally, the playground includes a number of items that the BES team felt are useful to include in the survey but didn't need to be asked to all respondents in every wave.

Campaign waves (waves 5, 8, 12, 18, and 28)
Four campaign waves (5, 8, 12, 18, and 28) were conducted as a rolling daily survey, with a subsample of respondents invited to complete the survey on each day of the campaign (the 2015 General Election campaign in the case of wave 5, the EU referendum campaign in the case of wave 8, the 2017 General Election campaign in wave 12, the 2019 General Election campaign in wave 18, and the 2024 General Election campaign in wave 28). There are five variables which record which day of the campaign a respondent completed the survey – CampaignDayW5, CampaignDayW8, CampaignDayW12, CampaignDayW18, and CampaignDayW28, which is the numeric day of the campaign period and respdateW5, respdateW8, respdateW12, respdateW18, and respdateW28, which is a formatted date variable. See above for information about the daily weighting variables (e.g. wt_daily_W5) available for the campaign wave.

Due to a technical error the party contact questions were not asked of those respondents who took the survey during the first weeks of the campaign in wave 5. It was asked of respondents who took the survey on and after April 24th 2015.

Panel refresh (wave 16)
The British Election Study Internet Panel offers huge advantages to studying British politics. So much of the current political situation can only be understood in terms of how individual voters are changing their attitudes and behaviours. The 16 waves of the panel conducted since 2014 offer an unparalleled picture of the volatile journey taken by British voters over this turbulent period.

However, panel data is not without its drawbacks. Taking all 16 waves of the panel means that a respondent would have spent more than five hours taking BES surveys over this time period. It is therefore a reasonable question to ask whether any normal person can be expected to do this, and whether even a normal person might be changed by spending so much time taking political surveys. In technical terms, these are the problems of panel attrition (politically engaged people are differentially likely to stay in a panel) and panel conditioning (taking surveys can change people's opinions or behaviours).

Unlike some studies, our panel is designed to remain cross-sectionally representative at each wave. That means that you should be able to take a sample taken in wave 13 (2017 post-election wave) and make inferences about the attitudes of people at that time. To do this, YouGov samples replacement respondents who resemble the kind of people who had dropped out. This means that the raw sample at each timepoint remains representative of the population in terms of the factors that YouGov quota samples from. However, the potential concern is that the respondents who do stay in the sample within these factors will be unusual.

For instance, imagine that the only factors that are important are whether you were below the age of 40 or above the age of 40 and political interest. Young people have lower levels of political interest than older people. For the purposes of this hypothetical we weight and sample for age but we do not observe political interest.

In wave 1, we start with half the sample over 40 and half below with both groups having reasonable levels of political interest. However, in wave 2, many of the politically disinterested will have dropped out. Because young people have lower political interest, we have lost more young people than old people. To make the sample representative again we would sample young and old voters in the correct proportions. However, the problem comes because, while the sample of young people who dropped out was disproportionately uninterested in politics, the sample who are used to replace them are just normally interested in politics. At wave 3, the same thing happens again, with politically disengaged people dropping out and those who are interested in politics staying in the panel. Repeating this over many waves will gradually make the remaining young people more and more interested in politics because the disinterested topups tend to drop out while the politically interested topups tend to stay in.

In practice, YouGov's sampling procedures include a lot more factors than just age, so this problem should be reduced substantially. Most importantly, the sampling and weighting accounts for education, past turnout and political attention, which are probably the variables of most concern.

It is therefore an open empirical question as to whether the Internet panel's cross-sectional samples are skewed by differential attrition in practice and, if so, by how much. To test whether this was a problem (and to provide a solution), in wave 16 we conducted a panel refresh.

The idea behind this was that a new sample of 18,000 respondents (18,217 in practice) would be drawn from YouGov's panel without regards to whether they had taken part in previous BES surveys in addition to the standard goal of maximising retention. By chance, many of these respondents would have taken previous surveys, but the idea is that this 18,217 person sample represents the sample that we would expect to achieve if we started an entirely new panel with YouGov.

Because the longitudinal element of the BES is obviously highly important we did not want to risk the panel refresh interfering with long-term panel retention. To achieve both of these goals, we increased the total sample size for wave 16 to 37,959. This allows us to achieve both normal retention and a fresh sample could be simultaneously.

While there is much work left to do comparing the samples, our initial analysis does not suggest that the standard cross-sectional wave 16 sample yields meaningfully different results than our fresh wave 16 sample. Comparisons for vote intention, likelihood to vote, European Parliament vote choice and turnout are shown below using YouGov's standard weighting:

Vote intention	Fresh	Full
I would not vote	7.9	8.1
Conservative	11.7	12.1
Labour	14.3	14.1
Liberal Democrat	13.9	14.1
Scottish National Party (SNP)	2.8	2.7
Plaid Cymru	0.6	0.5
United Kingdom Independence Party (UKIP)	1.6	1.4
Green Party	6.9	6.4
Other	0.9	0.9
Change UK- The Independent Group	1.8	1.4
Brexit Party/Reform UK	18.3	18.1
Don't know	19.5	20.2

	18,217	37,959

EP vote	Fresh	Full
Conservative	6.2	6.7
Labour	10.5	10.7
Liberal Democrat	19.8	20.0
Scottish National Party (SNP)	3.1	3.2
Plaid Cymru	1.0	0.9
United Kingdom Independence Party (UKIP)	1.8	1.7
Green Party	14.5	13.8
Other	2.1	2.1
Change UK- The Independent Group	3.5	3.5
Brexit Party/Reform UK	35.7	35.7
Don't know	1.8	1.8
	11,770	25,837

EP Turnout	Fresh	Full
Did not vote	35.8	35.5
Voted	62.7	63.0
DK	1.6	1.6
	18,217	37,959

Turnout intention	Fresh	Full
Very unlikely that I would vote	9.5	9.6
Fairly unlikely	3.3	3.1
Neither likely nor unlikely	4.5	4.7
Fairly likely	11.2	11.2
Very likely that I would vote	67.3	66.9
Don't know	4.2	4.6
	18217	37959

EU referendum vote intention	Fresh	Full
Stay/remain in the EU	46.7	46.5
Leave the EU	39.8	39.8
I would/will not vote	6.6	6.8
Don't know	6.83	6.88
n	18,217	37,959

In each case, the weighted fresh and standard samples do not yield hugely differing results and there is no clear indication of a bias caused by the standard cycle of attrition and replenishment. The results of the panel refresh are encouraging for the ongoing quality of the panel. Panel attrition is not random and respondents who have taken very large numbers of waves should still be analysed cautiously. However, there is no evidence so far that the overall quality of the Internet panel is declining. There is no evidence that we should be more concerned about the representativeness of an internet panel cross-section wave conducted at wave 15 than at wave 2.

However, even if it does turn out later that some important factor is affected by panel attrition and conditioning, the fresh sample in wave 16 will ensure that there is a subsample of the panel that can be

used to diagnose this problem and correct it if needed. The indicator variable for the fresh sample is fresh_sampleW16 in the panel and the relevant weight is wt_fresh_W16.

Data updates
The most recent waves of the the British Election Study may be subject to updates. Users are encouraged to check their variables carefully and report any problems they find.

Legacy file
We maintain a legacy file for retired variables that we have removed due to a lack of reliability. This includes the personality items, which were included in previous versions of the panel, but have since been removed. We do not recommend the use of these variables, but we maintain the legacy file for replication purposes.

Most important issue (MII) coding

In each wave of the British Election Study Internet Panel, respondents are asked the following question, with the option to provide an open text response: "As far as you're concerned, what is the SINGLE MOST important issue facing the country at the present time?" Any response provided is then manually coded into a range of 50 codes (mii_cat), before being further collapsed into 12 (small_mii_cat) and then 4 categories (LRAL_mii_cat).

Where a respondent mentions only one word, whether the name of a code or something clearly related, these were assigned a code accordingly. However, other responses are less clear-cut, and are therefore hand-coded individually by research associates working on the BES.

Where an individual mentioned more than one issue, for example "Health and education", their response was coded as the first one they mentioned. An effort was made to interpret misspellings or autocomplete errors, but where this was impossible these were marked as 46 – Uncoded.

To provide more information to users on these variables, what follows is a list of the codes and some exemplar responses coded under these (exemplar responses are presented verbatim), followed by two tables summarising how these codes are collapsed into a smaller number of categories in the small_mii_cat and LRAL_mii_cat variables. While the main panel and individual wave files include only these categorised variables, the original verbatim responses are available in the strings file on the BES website, should users wish to carry out their own analysis.

Open text responses in wave 26 were coded using large language models – GPT-4o from OpenAI – and not by BES research associates. As such, these variables are named mii_cat_llm, mii_small_cat_llm, and LRAL_mii_cat_llm. This approach quickly and accurately codes the open-ended survey responses for the most important issue, with the validity of this approach tested within Mellon et al. (2024).

1. Health

Generally, these responses referred to the health service itself, whether directly or referencing threats to it: "NHS", "Health Service", "NHS crisis", "NHS underfunding", "Privatisation of NHS", "Junior doctors". Also included were responses such as "nhs freeloaders". Note that this code excludes Covid-19 specific responses, which have their own code from wave 20 onwards.

2. Education

Apart from just the single word "education", this also includes related responses such as "poor standards of education", "underfunding in education", "skill shortages", "university tuition fee", "state of schools", "Teacher's salaries".

3. Election outcome

This code was used when the respondent is referring to the result of a recent or upcoming election but in a way that is relatively neutral (or insufficiently negative to be coded as either pol-neg or partisan-neg), or positive about a particular outcome. This includes references to internal party elections (eg those to select Theresa May's successor). Examples include: "election", "The up coming General

Election", "hung parliament", "23-Jun-2016", "Ensuring the Conservative party are successful", "the next prime minister", "The possible election of Jeremy Corbyn", "Choosing the right Government!".

4. Pol-neg

Responses were coded pol-neg whenever the respondent was negative about the current states of politics or politicians in general. Examples include: "Lying politicians", "corruption", "The unelected Government", "untrustworthy MPs", "political chaos", "no strong leadership", "Lack of democracy", "Honesty", "Lack of compassion", "Indecision", "Dysfunctional political system". Complaints about media bias, regardless of the alleged direction of the bias, were coded pol-neg. Examples include: "biased media", "The media i.e. BBC and tabloids" "misinformation" and "Mainstream Media bias". However, accusations of media bias or control that explicitly reference antisemitic conspiracy theories were instead coded with other conspiracy theories as 8 – Nat ident, goals-loss.

5. Partisan-neg

Conversely, the partisan-neg code is used when individuals are negative about a specific political party or politician. Sometimes this is just the name of the party or individual (which in the context of the most important issue facing the country implies a negative interpretation), but these are also often accompanied by clearly negative statements. For example: "getting the tories OUT", "Keeping Jeremy Corbyn out of Downing Street!!", "Disposing of the Clown – Boris Johnson", "DUP being involved in forming a government", "useless Labur party". Partisan-neg is only used when a specific party or politician is explicitly named. Responses that insinuate a particular politician or party, but do not name them, are coded as pol-neg. Examples of this include: "Changing prime minister for someone truthful", "Corrupt government/prime minister" and "Corrupt dishonest government led by a habitual liar who is unfit to be PM" which are all coded as 4 – Pol-neg.

6. Societal divides

This code is used when respondents refer to division or a lack of cohesion in British society, but without making reference to either economic or cultural divides specifically. This includes references to regional division, eg "Widening gap between London and the rest of the country". Examples of responses coded this way include: "unity", "social cohesion", "Acceptance of each other's differences", "the break down of society", "healing a very divided country", "Division and lack of understanding".

7. Morals

Responses coded under morals tend to either refer to morals directly, or to issues generally considered under this grouping, e.g. "Declining moral standards", "ethics", "Lack of moral compass". It also includes responses referring specifically to the need for religious or spiritual guidance, eg "Disregard of God", "Turning away from Christian faith and values". This code is also used for non-criminal and non-religious moral behaviour that the respondent views as having a corrupting effect on society, for example "a general selfishness and concentration on money", "endemic self interest", "greed", "Lack of compassion and love", "selfishness".

8. Nat ident, goals-loss

This code is used where an individual is expressing concern about cultural change, sometimes to an extreme and prejudiced degree, but without direct reference to immigration. For example, some individuals just put "Islam", while others contextualised this: "Muslims wanting England to change to Islam.Must never happen!!!!". There was also sometimes a sense of nostalgia and loss: "Britain losing its identity". This code includes responses directly expressing opposition to Black Lives Matter: "BLM - it should be ALL INNOCENT LIVES MATTER, do not destroy British history", "BLM scum running riot", "BLM riots". However, responses that might be referencing Black Lives Matter in Wave 20 (which took place in June 2020), but do not name it specifically, are coded as 41 – Pol values – auth (e.g. "Civil unrest and anarchic protests", "Demonstrations, thuggery & vandalism", "rioting and violence"). The 'nat ident, goals-loss' code also includes responses stating their opposition to alleged conspiracies, such as "a global agenda to force us into a one world government", "stopping the new world order" or "The Elite (Klaus Schwab from the World Economic Forum)". However, conspiracy theories explicitly about Covid-19 are coded as 48 – Coronavirus.

9. Racism/discrimination

In general, this code is used where individuals identify racism or discrimination directly as the most important issue facing the country. This includes discrimination against other marginalised groups, such as those with disabilities or immigrants. Examples include: "Intolerance", "Xenophobia", "Bigotry and misinformation", "Rising racism", "The mistreatment of the windrush generation", "Abuse of disabled people's human rights". This code also includes responses expressing support for Black Lives Matter or those for whom support/opposition is ambiguous. For example: "Black Lives Matter", "Racism and Black Lives Matter movement" and "Right wing and authoritarian responses to the BLM protests".

10. Welfare

This code is used when respondents mention either the welfare system or benefits generally, including responses such as "benefits", "Welfare state", "ATOS" etc. Note that as with most of the other codes, this can be either broadly positive or negative about the welfare state, and so includes responses such as "The attack on benefits" or "Persecuting those who rely on the welfare state", but also "scroungers" and "Benefits dependency".

11. Terrorism

Responses were coded this way if they mentioned terrorism directly (even if this was qualified eg "Possible terrorism" or "Islamic terrorism"), "extremism", the name of a terrorist group such as "ISIS" or a specific terrorist act, eg "Manchester bombing" or "Murder of female MP".

12. Immigration

If a respondent mentioned immigration or related issues then this code was used – except if they specifically referenced asylum or refugees, which is coded separately below. This includes responses simply saying "immigration" or "to many migrants", as well as qualifiers or related terms such as "Illegal immigration", "Uncontrolled immigration", "the cost of immigration", "ECONOMIC MIGRATION" and "control of our borders". It also includes responses that emphasise overpopulation, except where these make explicit reference to environmental concerns (which are coded as 40 – Environment), or to global overpopulation, which is coded as 45 – Other.

13. Asylum

This code was used when respondents specifically referenced asylum or refugees, whether using solely these particular words or in the context of a longer response, eg: "too many asylum seekers/immigrants coming into our country". In some cases this included those in support of refugees, eg "Fair deal for asylum seekers", "uk should be taking in more refugees".

14. Crime

When the respondent mentioned either "crime", "Anti-social behaviour" or specific crimes it was coded this way, eg "Killings", "Knife crime", "Fraud", "Gangs". In addition, references to "law", "law and order", "legal system" and "policing" were put under this code. Additionally, responses referencing "drugs" generally or specific drugs, eg "Cannabis use" were also coded this way.

15. Europe

Responses referencing Brexit, the EU and the EU referendum were put under this code, including those which referenced the consequences of Brexit, eg: "Industries leaving UK due to brexit". Where responses were primarily negative about politicians (even if this was in relation to Brexit), this was coded as 4 – Pol-neg.

16. Constitutional

This code was used for constitutional topics (excluding devolution and Scottish independence, which are coded separately), such as mentions of "constitution" or "constitutional change", calls for changes to the electoral system, abolition of the monarchy, Welsh independence, or around the West Lothian question, eg "English voting by English MP's". It also includes responses regarding Northern Ireland's future as part of the United Kingdom, and issues related to Northern Ireland's governance, such as the Good Friday Agreement. This code also includes complaints about the current electoral system, e.g. "Fair Voting system".

17. International trade

Responses focusing on trade or related terms were coded under this category, for example "Balance of Trade", "TRADE DEFICIT", "TTIP", "Cheap Beef Imports". This included references to post-Brexit trade deals, eg "Leaving the EU with trading arrangements in place", "Probable Trade agreement with US to import chlorinated chicken". This code is also used for answers where the respondent wants the UK to be less reliant on international trade and increase self-sufficiency, or concerns about which countries will supply the UK with essential goods and commodities, eg "Where to get energy. Definitely not Russia", "Country is reliant on too many other countries for energy and investment" or "UK trade deficit, and separately lack of UK self sufficiency (fuel, etc.), leaking money out of the country and diminishing UK wealth and power."

18. Devolution

This code was used where an individual specifically referenced devolution, either on its own or in reference to a specific constituent nation of the UK, eg "Devolution of power across the UK", "Devo Max".

19. Scot-ind

Conversely this code was used when an individual made specific reference to Scottish independence or related subjects, eg: "Scottish independence vote", "Preservation of the Union", "The fight for independence", "the 'yes' vote".

20. Constitution

This code is collapsed into code 16, and so is not present in the final data.

21. Foreign affairs

This is a residual code, which captures any responses relating to foreign affairs that are not specifically about war or defence, nor referencing Brexit or the EU. For example, "global instability", "Our relationship with other nations", "Trump" It also includes references to foreign aid, eg "Foreign aid costing us billions". With regards to the 2022 invasion of Ukraine, when respondents have said the word 'conflict', 'war' or 'invasion' it is coded as 22 – War, but if they, instead, only say words such as 'Putin', 'Ukraine' or 'Russia' without other context it has gone in foreign affairs.

22. War

This code is used for specific references to war or military intervention, eg "prospect of war", "world war 3", "The new war in Iraq", "The air strikes", "Nuclear war", "War in Ukraine", "Russia's invasion". It also includes references to the opposite, the need for peace, eg "world peace".

23. Defence

Responses which focus on either "Defence" or "Security", reference the funding of the military eg "Level of Armed Forces", or specific military spending eg "Decision on renewal of Trident", but do not mention war or conflict, are coded under this category. With regards to energy, food or fuel, responses on this topic that refer to their security are coded as defence. Examples include: "food and energy security", "Energy security" or "Making our country more resilient - security/energy wise".

24. Foreign emergency

This code is used when an individual references a foreign emergency that is not specifically about war, for example "Hong Kong", "Natural disasters" or "Genocide".

25. Domestic emergency

Relatedly this code is used when the respondent refers to a particular domestic emergency affecting Britain at the time. Examples include "Flooding", "storms" and "Grenfell Tower". It also includes respondents speculating on future potential emergencies, such as running out of energy or power blackouts in the wake of Russia's invasion of Ukraine.

26. Economy-general

This code is used for any response that refers to the economy in general, whether by simply saying "economy" or related terms such as "recession" or "Financial stability". This code also includes generic references to "supply chain issues" when there is no specific reference to what is being supplied. References to strikes and labour relations are under this code too. However, this code excludes responses that are more focused on the economic consequences of Brexit, which comes under code 15 – Europe, or the Covid-19 pandemic, which is given its own code (49 – Covid-economy). It also excludes more specific references to economic phenomena, such as unemployment and inflation, which are also coded separately as below.

27. Economy-personal

Conversely this code is used when the respondent focuses specifically on their own economic circumstances or that of their family. For example: "not being able to pay my bills", "family finances", "christmas debt", "The future prospects of my kids".

28. Unemployment

This category is used for issues relating to the labour market, so when the respondent mentioned "unemployment" directly, as well as "jobs" or simply "work", it was coded under this category. However, also included are responses that refer to the conditions of work, for example "Zero hours contracts", as well as references to labour shortages.

29. Taxation

This code is used for responses mentioning "taxation" generally, "high taxes" or specific taxes, eg "Inheritance Tax". In addition, references to "Tax avoidance" and related terms are also included here.

30. Debt/deficit

This code is used for any references to public debt or "the deficit", eg "National debt", "Government debt", "Debt Crisis". It also includes references to public waste or "overspending by Government". If a respondent just says "debt" with no other context, this code is used. References to personal debt is coded under 27 – Economy-personal above.

31. Inflation

Whenever a response focuses directly on inflation, eg "inflation and interest rate rise", this code is applied.

32. Living costs

Conversely, when the response is focused more on the cost of living, this code is used. Sometimes this phrase or variants of it are used, but the code also includes references to prices of essentials eg "the price of food", "cost of gas and electric" or "Utilities", as well as the impact of wages eg "low pay and rising prices" or "falling living standards".

33. Poverty

This code is used when the response either directly references poverty or related topics, such as "food banks" or "People suffering below the breadline".

34. Austerity

References to "austerity" directly, or cuts to public services more generally, are coded under this category. Example responses include: "Cuts", "Public Services being destroyed", "Reductions in public spending leading to lack of essential services", "cut backs at local government level".

35. Inequality

This code is used for mentions of "inequality" and related concepts, such as "the wealth divide", "the massively widening gap between rich and poor", "Creating a fair society", "the split between the haves and have nots", "The young generation being let down by baby boomers". Also coded here are references to regional inequality, eg "Inequality between London/SE and rest of UK".

36. Housing

All references to housing are put under this code, including responses such as "Lack of affordable housing", "house prices", "affordable social housing", "Housing bubble". Note that this includes references to homelessness, except where the respondent was very explicit about the relationship between poverty and homelessness, where this was coded as 33 – Poverty.

37. Social care

Where the respondent specifically said social care, or related topics such as "Care for the elderly", this code was used. This included references to other forms of state-funded care, such as for children or that for disabled people, as well as carer's allowance. Where respondents mentioned both health and social care, the response was coded by whichever was mentioned first.

38. Pensions/ageing

This code covers two main themes – any mentions of pensions specifically, and references to the effects of an ageing population, eg "Cost of aging population" or "OLD PEOPLE". It also included references to specific pensions issues, such as "WASPI Women".

39. Transport/infrastructure

This code was used when respondents mentioned either transport or infrastructure generally, but also specific types of infrastructure (eg "Lack of buses", "Railways", "pot holes on the road", "energy generation", "energy provisions"), or particular infrastructure projects ("wasting money on HS2").

40. Environment

References to the environment directly, or to climate change and its consequences, are put under this code. For example, this includes responses such as "Global warming", "Confronting climate change", "Destruction of countryside", "Environmental degradation", "Sustainability", "the decline of bees due to pesticide use". This category also includes responses that challenge the existence or importance of

climate change. In addition, concerns about the effect of planning on the local environment are also coded here, eg "Building on greenbelt", "Fracking". While flooding is placed under domestic or foreign emergencies as appropriate, this code is used for references to flood prevention, or if referenced more generically as a result of climate change. Single word responses relating to "energy", "food" or "fuel" with no other context is placed in this category. Responses that worry where future energy sources will come from due to climate change concerns (eg "depleting oil supplies") go in this category, whereas general worries about where to procure energy supplies outside of the UK are coded as 17 – International trade.

41. Pol values – auth

This code – the first of those based on the political values scales – is used to code those responses that do not fit into the above policy or issue priorities, and are aligned with the authoritarian position on the social values axis. There are three main types of response coded this way. The first is issue-based, where the respondent references a political issue in line with authoritarian opinion: "The rise in identity politics", "Victim culture", "Political correctness gone mad", "Veganism". The second captures political tribalism, where the respondent negatively describes their perceived opposition: "Left liberalism – wokeness", "wokerati", "Left wing anarachists". The third more relates to outlook, demonstrating the authoritarian preference for hierarchy, order and tradition, and pessimism where this is lacking: "respect for authority", "social order", "Safety of all residents", "The importance of discipline", "social decline". Responses that say that there is a lack of respect for authority or from young people are placed in this category, eg "lack of discipline and respectfulness amongst children of school age", "No respect for authority and very poor leadership", "Respect for elders". However, when the response is a vaguer and does not specify who or what is being disrespected, or is lamenting the lack of mutual respect within society, the response is coded as 7 – Morals, eg "Lack of respect & care", "Lake of respect for each other", "Disregard and disrespect".

42. Pol values – liberal

This code is used similarly to 'Pol values – auth', but on the other side of the axis. In this way, related policy issues are responses such as "animal welfare", "state intrusion into privacy", "IP Bill", "Dignity in dying", "Protecting the BBC", "Internet neutrality". Tribal opposition is captured in responses like "Fascism", "Nationalism", "The rise of far-right groups such as Britain First", "jingoism", "alt right", "Populist nationalist authoritarianism". Finally, responses that more relate to the liberal outlook include "freedom", "Tolerance", "Access to justice", "Civil Liberties", "Freedom of speech", "Human rights", "peace and compassion".

43. Pol values – right

The next political values code captures those response that align with the right-wing pole of the economic values axis. Policy priorities mentioned put under this code include: "unions getting more power", "bbc licence fee", "Nanny state", "too much red tape", "Inefficient Government/Civil Service". Tribal opposition is represented by responses such as: "The evils of socialism" "Far Left", "Marxism", "Communists". While responses that more generally express this outlook include: "People's lack of responsibility", "Too much government", "Statism", "The Work Shy".

44. Pol values – left

The final political values code is for responses that sit on the left of the economic values axis. Policy or issues priorities mentioned that are coded this way include: "privatisation of public services", "Workers rights". While responses that are more tribally opposed to a group, ideology or identity coded like this are: "Capitalism", "Neo Liberalism", "corporatism", "Extreme Right Wing Views", "Banking Cartel", "The Bourgeoisie", "multi national companies". Finally, those responses placed in this category that reflect the left-wing economic outlook are: "Redistribution of wealth", "Social Justice", "Lack of empathy towards the less fortunate in society", "economic injustice".

45. Other

Any response that clearly mentioned a political issue or policy area but could not be placed in any of the previous categories was coded under this category.

46. Uncoded

Conversely, this code is used for those responses which cannot be coded as they are unintelligible, are excessively vague as to what aspect of politics they are getting at (eg "So many issues, not sure where to start", "attitudes", "our future"), do not relate to politics or society in any meaningful way or when it is impossible to choose between multiple possible codes.

47. Referendum unspecified

This code is used when the respondent refers to a referendum but it is not clear which one they are referencing, whether that for Scottish Independence, for leaving the EU, or another.

48. Coronavirus

This code is used from wave 20 onwards for all references to Covid-19, except those where the primary focus is on the economic effects of the pandemic. Examples include: "Coronavirus pandemic", "Covid-19", "Track, test and isolate to drastically reduce Covid 19", "People ignoring self distancing". Indirect references to Coronavirus, its effects, the response to it and its aftermath are also coded this way. This includes "getting everything back up and running", "getting freedom back in this country", "Getting life back to normal", "Loss of personal freedom", "travelling abroad" and "the fact that thousands of Indians and Pakistanis havebeen allowed into the country without being tested, therefore bringing the virus into the country". Responses that downplay the importance of Covid-19 or suggest that it is a conspiracy (e.g. "the plandemic") are also coded here.

49. Covid-economy

This code was also introduced in wave 20 to capture concern about the impact of the Covid-19 pandemic and the subsequent policy response on the economy. Examples include: "Economy during coronavirus", "Business failure due covid19", "Finding a way to protect health without killing the economy", "Managing the balance of the economy and Coronavirus", "Furlough scheme/covid".

50. Gender/sexuality/family

This code is used for references to gender, sexuality or family issues, regardless of the political perspective of the response. Specific issues in this code include abortion, LGBT+ issues, feminist and

anti-feminist perspectives, and the role and quality of contemporary family life. Examples include: "Abortion are too easy to access", "Sex is male and female", "Transgender ideology", The patriarchy", "Rape culture", "Gender Discrimination against men", "homophobia", "affecting me, it would be transphobia", "family breakdown", "marriage and the family" and "parental role and responsibilities". Note, responses about 'WASPI' women's pensions are coded as ageing/pensions. With regards to childcare, just the response 'childcare' is in the social care category, and responses about its cost (eg "cost of childcare") are in the living costs category.

representMayDealGrid

Recently, Parliament voted three times on the deal negotiated by the Conservative government to leave the European Union under certain arrangements. The Prime Minister's deal would allow for reciprocity between all UK citizens currently in the EU and all EU citizens currently in the UK, would arrange to settle all accounts between the UK and the EU, and would prevent a "closed" or "hard" border between the UK and Northern Ireland.

ROWS

representMayDealSelf	Do you support or oppose the Prime Minister's proposal?

Module: scotWave2Exp if country==2

Page: dummyScotExp

Page: treatment1 if ScotExp_randID==1

One topic of the referendum debate has been whether an independent Scotland would be a member of the European Union. According to Alistair Darling from the ʹBetter Together ʹcampaign, Scotland would have to leave the EU, reapply for membership and ʺnegotiate its way back in". But Alex Salmond rejects this claim, saying that ʺScotland is already a member of the EU and that would continue".

manipCheck1	SINGLE CHOICE	W2
Which of these best describes your own view on what would happen to Scotland if there was a 'Yes' vote?		

1 ○ Definitely remain a member of the EU

2 ○ Probably remain a member of the EU

3 ○ Not at all sure

4 ○ Probably not remain a member of the EU

5 ○ Definitely not remain a member of the EU

99 ○ Don't know

Page: treatment2 if ScotExp_randID==2

One topic of the referendum debate has been the currency that would be used in an independent Scotland. According to Alistair Darling from the 'Better Together 'campaign, "it is now a simple fact that Scotland cannot keep the pound if we leave the UK". But Alex Salmond describes this as a 'scare tactic', saying that Scotland would continue to use sterling which "is as much Scotland's as the rest of the UK's".

manipCheck2	SINGLE CHOICE	W2
Which of these best describes your own view on what **would** happen to Scotland if there was a 'Yes' vote?		

1   ○   Definitely continue using the pound

2   ○   Probably continue using the pound

3   ○   Not at all sure

4   ○   Probably not continue using the pound

5   ○   Definitely not continue using the pound

HOW DO YOU WANT THE GOVERNMENT TO SPEND YOUR MONEY? The government spends public monies on many things in various areas, such as health, pensions, environment, and employment. In order to make sure that government spending is reasonable and provides value for money to society, it is important to understand how the general public feel about government spending on different areas. To do so, for the next part of the survey you will be presented with a number of different areas of government spending. We will then ask you to choose an area that you believe that the government should spend the **most** in and another area that the government should spend the **least** in.

page hudsonIntro

The following questions are about people you know yourself. These people might be family members, friends or acquaintances, but not people you may only have heard of, or do not know personally. The questions will ask if you currently know someone with a particular skill or occupation and how you would be able to reach that person.

resourceAccess1

Do you personally know anyone who knows a lot about the following things and who you could reach on short notice, say within a week? And how would you reach that person, via the internet (such as email, Twitter, Facebook) or in other ways (such as in person or over the phone)? Please answer all these questions, even if you would not need to get someone to do these kinds of things for you.
Do you personally know someone who...?

Do you personally know anyone who knows a lot about the following things and who you could reach on short notice, say within a week? <

bes1a   SINGLE CHOICE   W2
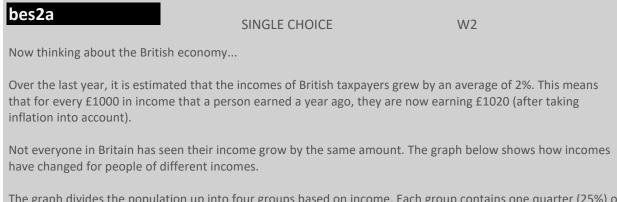

Now thinking about the British economy...

Over the last year, it is estimated that the incomes of British taxpayers grew by an average of 2%. This means that for every £1000 in income that a person earned a year ago, they are now earning £1020 (after taking inflation into account).

Thinking about how much information regarding the British economy gets out to the public, how aware, if at all, do you think most people are about how incomes have changed in Britain recently?

1   ○   Very aware

2   ○   Fairly aware

3   ○   Not very aware

Now thinking about the British economy...

Over the last year, it is estimated that the incomes of British taxpayers grew by an average of 2%. This means that for every £1000 in income that a person earned a year ago, they are now earning £1020 (after taking inflation into account).

Not everyone in Britain has seen their income grow by the same amount. The graph below shows how incomes have changed for people of different incomes.

The graph divides the population up into four groups based on income. Each group contains one quarter (25%) of the population. In the graph, we can see how much incomes have gone up or down for individuals in the poorest quarter, the lower-middle quarter, the upper-middle quarter, and the richest quarter of the population.

Thinking about how much information regarding the British economy gets out to the public, how aware, if at all, do you think most people are about how incomes have changed in Britain recently?

EU referendum vote intention

Note on the EU referendum questions:

During waves 7 and 8, respondents were asked which way they intended to vote in the EU referendum and then respondents who said don't know were asked a follow-up squeeze question. In wave 8 respondents were also asked about whether they had applied for a postal vote and whether they had voted with it.

euRefVote- Combines the squeezed and unsqueezed responses and postal votes where applicable

euRefVoteUnsqueeze- Just the unsqueezed responses (excluding postal votes)

euSqueeze- Just the squeezed responses

euRefVotePost- just the postal vote responses

riskScale

We will now ask you to imagine four different situations. Each time we will ask you to choose between a guaranteed payment and an even (50-50) chance of getting £300 or getting nothing.

 Please imagine the following situation. You can choose between a guaranteed payment of…., or having an even (50-50) chance of getting £300 or getting nothing.

(The first round is a choice between a 50/50 chance of £300 or a guaranteed payment of £160. Subsequent rounds are determined by choices made in the previous rounds. The routing of the rounds and the final score as coded in the riskScale variable is shown below, higher scores mean more risk taking)

Changelog

This section records the significant changes made to the British Election Study Internet Panel for each version, starting with version 24.0.

Version 24.0

Datafixes

- Ensured maximum completeness of geographic variables at each wave, drawing on profiles data and survey data where this is missing

- Added ONS codes for both Westminster Parliamentary Constituency (pcon_code) and Local Authority (oslaua_code) to help with merges with other data sources

- Condensed education/p_education and edlevel/p_edlevel variables down to one variable each, prioritising survey data and supplementing this with Profiles data where unavailable

- Corrected some missing rows in wave 2 and 3 attributable to respondents being under-18 (and added an under-18 indicator variable for each wave to help filter these respondents)

- Combined the following occupational variables as topups where appropriate: workingStatus, prevJob, selfOccStatus, selfOccStatusLast, selfOccSupervise, selfOccSuperviseLast, selfOccOrgSizeLast, selfOccEmployees, selfOccEmployeesLast, selfNumEmployees, selfNumEmployeesLast

- Added combined parental occupation and education topup variables (parentOccStatus parentOccSupervise parentOccEmployees parentNumEmployees parentOccOrgSize

parentEducation)

- Merged parental vote topup variables for W20, W22 and W23 (motherVote and fatherVote)
- Added ageW9 to the panel file
- Corrected some miscoding of pccVote and happyEULeave variables
- Fixed coding of DKs in smallEmergency2 variable
- Fixed small miscoding of p_country_birth
- Dropped xsexualityW10 as supplanted by p_sexualityW10
- Merged renationaliseRail topup question in W12 to create renationaliseRailW11W12
- Corrected coding of DKs in EconImpactW23 variables
- Added homenorm variable to both datafile and documentation

MII

- Added coded MII up to W24
- Recoded some MII responses from previous waves to ensure consistency across coders (and added previous MII coding to legacy file)
- Changed MII collapse coding to put living costs in economy not inequality and added collpased categories for new post-W20 codes

Labelling

- Improved value and variable labelling throughout, by systematically identifying variables with missing value and variable labels
- Clarified value labels for euRefVoteAfter and scotReferendumIntention
- Created a single JACSsubjectW19 variable with value labels

Documentation

- Included much more detail on MII coding in documentation
- Updated retention statistics for wave 21 onwards to be in a consistent format with previous waves
- Added p_hh_children to documentation

Version 25.0

Datafixes

- Added housing wealth variables (homeOwn2W23 buyHouseYearW23 homeFinanceW23 inheritMoneyW23 inheritChangeCircsW23 homeOwn2W25 homeFinanceW25 inheritMoneyW25 inheritChangeCircsW25).

- Ensured maximum completeness of p_gender and p_socgrade variables at each wave, drawing on profiles data and survey data where this is missing.

- Corrected the string file to restrict it to only include string variables

Labelling

- Fixed labelling issue with winConstituencyIndW17 and winConstituencyIndW18 – this was labelled as UKIP but should have been an independent candidate.

Documentation

- Added p_education, p_edlevel, and p_edlevelUni to the documentation.
- Logged problem with mansfieldMayorW25 question wording in the documentation.

Version 25.2
Datafixes

- Added immigEcon back to wave 21
- Resolved the incorrect ages displaying for 11 respondents in the panel
- Added ns_sec and ns_sec_analytic top-up information for waves W10-W15
- Recorded change of p_oslaua to oslaua in the documentation
- Recorded change in labelling of p_eurefvote variable in the documentation

Version 29.1
Datafixes

- Added value items and scales to wave 27 standalone file
- Fixed inaccurate labelling for Brexit and environment selfPriorities variables
- Rename party priority variables for waves 20, 27, and 29 for consistency
- Renamed weight wt_new_W29 to wt_new_W29_result for consistency
